Small shop stock sheet

Count the shelves, see what to reorder and keep supplier details at hand.

Count each shelf and write the number in the Qty column. When a count falls to the reorder level, order more from the supplier.

1. Fill the sheet on paper or keep the ready CSV file as a start.
2. Or open the CSV file in Excel or Google Sheets and type your items in.

Printing and using this sheet is free. The CSV file is for spreadsheet apps; it cannot be imported into the app.

Item	Qty	Reorder at	Supplier	Shelf
T-shirt white M	24	8	Textile Partners	A1
T-shirt white L	18	8	Textile Partners	A1
